Bugfix: Installments total number
- **1.0.1**
Compatibility updates
- **1.0.0**
Initial release

Description

Cardlink Payment Gateway allows you to accept payment through various schemes such as Visa, Mastercard, Maestro, American Express, Diners, Discover cards on your website, with or without variable installments.

This plugin aims to offer new payment solutions to Cardlink merchants through the use of CMS plugin for their website creation and provide the possibility to add extra features without having web development knowledge.

Merchants with e-shops (redirect cases only) will be able to integrate the Cardlink Payment Gateway to their checkout page using the CSS layout that they want. Also they could choose between redirect or iframe option for the payment environment.

Once the payment is made, the customer returns to the online store and the order is updated.

Once you have completed the requested tests and any changes to your website, you can activate your account and start accepting payments.

Features

1. A dropdown option for instance between Worldline, Nexi and Cardlink.
2. Option to enable test environment. All transactions will be re-directed to the endpoint that represents the production environment by default. The endpoint will be different depending on which acquirer has been chosen from instance dropdown option.
3. Ability to define the maximum number of installments regardless the total order amount and ability to define the ranges of the total order amounts and the maximum installments (up to 10 conditions) for every range.
4. Option for pre-authorization or sale transactions.
5. Option for a user tokenization service. The card token will be stored at the merchant's e-shop database and will be used by customers to auto-complete future payments.
6. Redirection option: user should have a checkbox to enable pop up with iframe without redirection.
7. A text field for providing the absolute or relative (to Cardlink Payment Gateway location on server) url of custom CSS stylesheet, to change css styles in payment page.
8. Translation ready for Greek & English languages.
9. IRIS payments. Upon installation, an extra payment is created.
10. Not supporting iframe. The IRIS payments do not support the iframe feature.

Installation

If you have a copy of the plugin as a zip file, you can manually upload it and install it through the Plugins admin screen.

1. Navigate to Plugins > Add New.
2. Click the Upload Plugin button at the top of the screen.
3. Select the zip file from your local filesystem.
4. Click the Install Now button.
5. When the installation is complete, you'll see "Plugin installed successfully." Click the Activate Plugin button.

In rare cases, you may need to install a plugin by manually transferring the files onto the server. This is recommended only when absolutely necessary, for example when your server is not configured to allow automatic installations.

This procedure requires you to be familiar with the process of transferring files using an SFTP client. It is recommended for advanced users and developers. Here are the detailed instructions to manually install a WordPress plugin by transferring the files onto the webserver.

Screenshots

1. The Cardlink settings screen used to configure the main Cardlink gateway.

The screenshot shows the 'Cardlink Payment Gateway' settings page in a WordPress admin dashboard. The left sidebar contains navigation menus for Posts, Media, Pages, Comments, WooCommerce, Home, Orders, Customers, Coupons, Reports, Settings, Status, Extensions, Products, Analytics, Marketing, Appearance, Plugins, Users, Tools, and Settings. The main content area is titled 'Cardlink Payment Gateway' and includes a 'Save changes' button at the bottom. The settings are organized into several sections:

- Enable/Disable:** Enable Cardlink Payment Gateway
- Test Environment:** Enable Cardlink Test Environment
- Select Acquirer:** Cardlink Checkout (dropdown menu)
- Title:** Online secure payment with (text input)
- Description:** Make your payment with Cardlink (text input)
- Merchant ID:** 90003052 (text input)
- Shared Secret key:** (text input)
- Maximum number of installments depending on the total order amount:** A table with three rows: (50, 2), (100, 4), and (150, 6). Each row has a trash icon to its right. An 'Add variation' button is below the table.
- Pre-Authorize:** Enable to capture preauthorized payments. Default payment method is Purchase, enable for Pre-Authorized payments. You will then need to accept them from Cardlink's eCommerce Tool.
- Store card details:** Enable Tokenization. If checked the user will have the ability to store credit card details for future purchases. You must contact Cardlink first.
- Return page URL (Successful or Failed Transactions):** Thank you page (dropdown menu). We recommend you to select the default "Thank You Page". In order to automatically serve both successful and failed transactions, with the latter also offering the option to try the payment again. If you select a different page, you will have to handle failed payments yourself by adding custom code.
- Pay in website:** Enable payment iframe. Customers will stay in website to complete payments without redirecting to Cardlink's eCommerce payment page. You must have a valid SSL certificate installed on your domain.
- Css url path:** (text input). URI of custom CSS stylesheet, to be used to display payment page styles.
- Enable Debug mode:** Enabling this will log certain information. Enabling this (and the debug mode from your wp-config file) will log information, e.g. responses, which will help in debugging issues.

3. The IRIS Payment method settings screen used to configure the gateway.

The screenshot shows the configuration interface for the 'Worldline Processing Payment Gateway with IRIS'. At the top, there is a title and a brief description: 'Worldline Processing Payment Gateway allows you to accept payment through IRIS on your Woocommerce Powered Site.' Below this, there are three main sections: 'Ενεργοποίηση/ Απενεργοποίηση' (Activation/Deactivation) with a checked checkbox for 'Enable IRIS Payment Gateway'; 'Τίτλος' (Title) with a text input field containing 'Worldline Processing Payment Gateway with IRIS'; and 'Περιγραφή' (Description) with a text area containing 'Πληρώστε μέσω της Worldline Processing IRIS: Δέχεται Visa, Mastercard, Maestro, American Express, Diners και Discover.' At the bottom left, there is a blue button labeled 'Αποθήκευση αλλαγών' (Save changes).
